

### **Paper Jam!!!**

Sending insurance claims, recall, reminders, and patient billing statements by paper is a **huge waste** of our time and resources. Paper products have a tremendous energy requirement to grow, harvest, transport, manufacture, and deliver. As our resources become more and more scarce Americans will help where they can. Paper use is a place we can help. This applies directly to Data Team users.

Billing insurance claims electronically eliminates much of the waste. Benefits don't stop there. Office personnel spend only ten percent of the time taken to produce and mail a paper claim. Controlling insurance payment is much more efficient. Errors are flagged and corrected in a timely manner. Eliminating protracted rejections makes the process even more worthwhile.

Unfamiliar with the process, Data Team will send your claims with you and work out the details for a month to help you become an expert. You will save money, streamline your workload, and help the environment.

Collect email addresses and cell phone numbers for future use now. Recall and other reminders can currently be sent from your Data Team Program by email and interface with texting and voice systems.

Few dental offices have no Internet. The benefits are dramatic and outweigh the energy to start using the internet. The disadvantages are myth. No internet means: seeking benefits or eligibility on telephone hold, digging through storage to find envelopes and paper, going to the printers to pick up, buying stamps at the post office, paying UPS charges and sales tax, buying toner and fixing printers, and generally being wasteful and inefficient.

### **Left behind!**

Data Team can help! We can setup your system to be fool proof. We can teach all the ins and outs of Internet use. We can file your insurance billing and patient billing for you. Internet allows us to teach, provide on-site like instruction, and provide support and software for your office in minutes instead of days. We can sometimes relieve you of the need for an extra employee or make the ones you have more efficient.
